GMBSignals

Get Found. Get Ranked. Get Traffic.

Jimmy Anderson · jimmy@gmbsignals.app

Get your Google profile working for you — one time, no monthly bill.

I used to pay an agency $300 a month. They posted one photo a month. When I asked to see the work, I got the runaround. So I built my own tool. It shows where your business shows up on Google Maps and logs every change I make, so you can see the work yourself.

Profile Tune-Up

$300 one time

For businesses that already run their own Google profile.

- Right main category and the best extra categories
- Every empty field filled in
- Hours, phone, website and service area checked
- Services and a description written the way people search
- Photo cleanup
- Replies to your unanswered reviews

Claim & Setup

$500 one time

For profiles that were never claimed, were left alone, or have a duplicate.

- Everything in the Tune-Up
- Claiming and verifying the profile
- Sorting out duplicate listings so your reviews and calls add up in one place
- A clean starting point you own

Both include proof

- **Before map:** where you show up on Google Maps today, block by block.
- **After map:** the same map again 30 days later.
- **Work log:** every change I made, with the date, where you can see it.

My work promise

Every item on your checklist is done within 14 days, with a log you can see. If I don't deliver it, you get your money back in full.

My results promise

If your 30-day map shows no improvement, I keep working another 30 days for free.

Straight talk: one-time work helps most when the profile keeps getting attention — new photos, posts and review replies. I'll show you what to watch. If you ever want me to keep it going, we can talk then. No contract, no monthly bill unless you ask for one. I don't promise rankings — nobody honest can — I promise the work, and I show you the results.

Next step: a free 10-minute look at your map. **Email jimmy@gmbsignals.app**
